**The May 2015 Fiscal Confidence Index, Modeled after the Consumer Confidence Index, is 47 (100 is Neutral)**

**NEW YORK** — Americans remain highly concerned about the nation's long-term fiscal health, according to the Peter G. Peterson Foundation's May Fiscal Confidence Index, a monthly measure of public attitudes about the nation's long-term debt and the efforts elected leaders are making to address America's fiscal challenges. The Fiscal Confidence Index, modeled after the Consumer Confidence Index, is 47 (100 is neutral), indicating that even as the economy improves, voters continue to be concerned about the country's fiscal outlook and the level of attention that policymakers are giving these key challenges.

Eight in ten voters (80%) believe that the President and Congress should be spending more time addressing the national debt, and a clear majority believe the country is currently on the wrong track in addressing the issue (64% wrong track/24% right direction). At the same time, voters are slightly more optimistic than pessimistic that the United States will be able to make progress on the issue over the next few years (46% optimistic/42% pessimistic). To achieve more progress on our fiscal challenges, nearly eight in ten (76%) Americans want addressing the nation's debt to be among the President and Congress' top three priorities.

"Voters understand that a strong fiscal foundation is essential to creating a thriving economy with greater opportunity," said Michael A. Peterson, President and CEO of the Peter G. Peterson Foundation. "As the economy gains strength, policymakers have more flexibility and options at their disposal, and a majority of voters are calling for their leaders to get our nation's fiscal house in order."

The Fiscal Confidence Index measures public opinion about the national debt by asking six questions in three key areas:

- **CONCERN:** Level of concern and views about the direction of the national debt.
- **PRIORITY:** How high a priority addressing the debt should be for elected leaders.
- **EXPECTATIONS:** Expectations about whether the debt situation will get better or worse in the next few years.

The survey results from these three areas are weighted equally and averaged to produce the Fiscal Confidence Index value. The Fiscal Confidence Index, like the Consumer Confidence Index, is indexed on a scale of 0 to 200, with a neutral midpoint of 100. A reading above 100 indicates positive sentiment. A reading below 100

indicates negative sentiment.

### **Fiscal Confidence Index Key Data Points:**

- **The May 2015 Fiscal Confidence Index value is 47.** A score of 100 is neutral. Values below 100 show negative sentiment, while values above 100 show positive sentiment. (April's value was 47. March's value was 47.)
- The current Fiscal Confidence Index score for CONCERN about the debt is 38, indicating deep concern about the debt. The score for debt as a PRIORITY that leaders must address is 27, indicating that Americans want elected leaders to make addressing long-term debt a high priority. The score for EXPECTATIONS about progress on the debt is 75, indicating strong pessimism about the direction of long-term fiscal policy in the next few years. The Fiscal Confidence Index of 47 is the average of these three sub-category scores.
- For a description of the complete methodology, see the Appendix below.

The Peter G. Peterson Foundation commissioned a poll by the Global Strategy Group and North Star Opinion Research to survey public opinion on the national debt. The nationwide poll included 1,005 U.S. registered voters, surveyed by telephone between May 18 and May 21, 2015. The poll has a margin of error of +/- 3.1%. The poll examined voters' opinions on the national debt, political leadership, and America's fiscal and economic health.

Detailed poll results can be found online at: [www.pgpf.org/FiscalConfidenceIndex](http://www.pgpf.org/FiscalConfidenceIndex)

### **About the Peter G. Peterson Foundation**

*The Peter G. Peterson Foundation is a non-profit, non-partisan organization that is dedicated to increasing public awareness of the nature and urgency of key fiscal challenges threatening America's future, and to accelerating action on them. To address these challenges successfully, we work to bring Americans together to find and implement sensible, long-term solutions that transcend age, party lines and ideological divides in order to achieve real results. To learn more, please visit [www.pgpf.org](http://www.pgpf.org).*

### **APPENDIX: Fiscal Confidence Index Methodology and Questions**

- The Fiscal Confidence Index is released monthly by the Peter G. Peterson Foundation.
- The Fiscal Confidence Index value is based on six questions in three categories.
- As is done with the Consumer Confidence Index, the first step in calculating the Fiscal Confidence Index is determining the "Relative Value" for each question. This calculation is made by taking the positive response for each question and dividing it by the sum of the positive and negative responses. Each question was asked on a four-point scale, and answers were weighted according to intensity, with the strongest responses counting twice as much as the middle responses ("much" better or worse answers count twice as heavily as "somewhat" better or worse answers).
- The scores for the Concern, Priority, and Expectations categories are determined by averaging the scores derived from the two questions in each category.
- The Fiscal Confidence Index value is converted from the Relative Value to place it on a scale on which 100 indicates equal positive and negative sentiment, while values below 100 indicate negative sentiment and values above 100 indicate positive sentiment.
- The Peter G. Peterson Foundation commissioned the poll by the Global Strategy Group and North Star Opinion Research to survey public opinion on the national debt. The nationwide poll included 1,005 U.S. registered voters, surveyed by telephone between May 18 and May 21, 2015. The poll has a margin of error of +/- 3.1%. The poll examined voters' opinions on the national debt, political leadership, and

America's fiscal and economic health.

- The questions are as follows:

<b>CONCERN (38)</b>	
<p>Thinking about our national debt over the last few years, would you say your level of concern has increased or decreased? ? Is that a lot or just a little?</p>	
	(Don't know)
	<b>INCREASED</b>
	<b>DECREASED</b>
<p>When it comes to addressing our national debt, would you say things in the United States are heading in the right direction or do you think things are off on the wrong track? ? Do you feel that way strongly or just somewhat?</p>
