Despite higher healthcare spending per capita, the U.S. generally does not have better health outcomes

**Healthcare Spending Per Capita (Dollars) by Health Outcomes**

- **Average Life Expectancy**
  - **U.S.**
  - Data points show a trend where increased spending does not correlate with increased life expectancy.

- **Overweight or Obesity Rate**
  - **U.S.**
  - Data points show a trend where increased spending does not correlate with lower overweight or obesity rates.

- **Infant Mortality Rate per 1,000 Live Births**
  - **U.S.**
  - Data points show a trend where increased spending does not correlate with lower infant mortality rates.

- **Diabetes Admission Rate per 100k people**
  - **U.S.**
  - Data points show a trend where increased spending does not correlate with lower diabetes admission rates.

**NOTES:** Data are for 2018 or latest available for OECD countries. Data are not available for all countries for all metrics.
