America faces the dynamic combination of an evolving economy, a crowded legislative agenda, and an unsustainable fiscal outlook. As Congress and a new administration explore major changes in key areas—healthcare, taxes, infrastructure, trade, and more—our fiscal condition remains as important as ever.

With many reforms on the table, one issue impacts all the others: our unsustainable national debt. America's fiscal outlook is connected to all these issues because our growing debt threatens our economy and weakens our ability to address our most important budget priorities.

The national debt is already at its highest level since 1950 and is projected to grow rapidly in the years ahead. Over the last eight years, we added $7 trillion to the national debt. Over the next eight years we are set to borrow the same amount—another $7 trillion. By 2023, we'll be back to $1 trillion annual deficits under current law. And in just over a decade, interest on the national debt will be our third-largest federal "program."

All of the major reform proposals will impact, and are impacted by, the national debt. Given that 70 percent of the spending growth in our major entitlement programs is for healthcare, addressing the U.S. healthcare system is essential to improving our fiscal outlook. Tax reform can have a significant and direct effect on our fiscal path—making it far better, or far worse. If there is agreement that we need to address our infrastructure, how will we find the resources to pay for it—now and in the future—if we allow debt and interest costs to grow? How will America's workforce meet the challenges and opportunities presented by globalization if the national debt harms economic growth and America's leadership role in the world?

The 2017 Fiscal Summit will convene leading voices and policymakers from across the political spectrum to discuss the legislative agenda, its connection to our growing national debt, and solutions to put us on a better path. The Summit will address the significant fiscal implications of current reform proposals, and examine the opportunities that exist to ensure that policy solutions are sustainable, fiscally responsible, and supportive of economic growth.

America's rising debt must be a central part of the 2017 policy discussion, because addressing it is essential for us to meet the most pressing challenges of a changing economy.
The national debt is on an unsustainable path

The growing debt is caused by a structural mismatch between spending and revenues

**Federal Revenues and Spending (% of GDP)**

Net interest costs are projected to rise sharply

**Billions of Dollars**

Interest costs are projected to become the largest category of the budget.

**Budget Categories (% of GDP)**

- Interest
- Medicare
- Social Security
- Medicaid, CHIP & Exchanges
- Defense Discretionary
- Nondefense Discretionary
- Other Mandatory

**SOURCE:** Congressional Budget Office, *The 2017 Long-Term Budget Outlook*, March 2017; and PGPF projections based on CBO data. Compiled by PGPF.

**NOTE:** Medicare spending is net of premiums and payments from the states.

---

By 2047, interest costs are projected to be more than two times what the federal government has historically spent on R&D, infrastructure, and education combined.

**Federal Spending (% of GDP)**

- R&D: 2.6%
- Infrastructure: 1.4%
- Education: 4.0%
- Interest Costs: 6.2%

**NOTE:** Infrastructure excludes defense.
Mandatory spending and interest costs will climb significantly, while discretionary spending will fall to well below historical averages.

% of Federal Spending

- 62% in 2007
- 69% in 2017
- 77% in 2027

Mandatory Spending and Net Interest Costs

% of GDP

- 20-Year Average (1997-2016)

Discretionary Spending

- 38% in 2007
- 31% in 2017
- 23% in 2027

Discretionary spending funds a wide range of government programs.

2015 Discretionary Outlays
$1,169 Billion

- Defense
- Education
- Transportation
- Veterans Benefits and Services
- Income Security
- Health (Discretionary Only)
- International Affairs
- Administration of Justice
- Natural Resources and Environment
- General Science, Space and Technology
- Community and Regional Development
- General Government
- Medicare Administrative Costs
- Agriculture
- Social Security Administrative Costs
- Energy

NOTE: Data excludes allowances and functions with negative outlays. Health (discretionary only) includes National Institutes of Health, the Centers for Disease Control and Prevention, veterans healthcare, and administrative costs for Medicaid.
The United States spends more on defense than the next eight countries combined

NOTE: Data are not available for all countries for all metrics; all published data are shown. Data are for 2013 or latest available.

Life expectancy at birth in the United States is lower than in other developed countries, despite higher healthcare costs.

NOTE: Data are for 2014 or latest available. The trend line comes from a logarithmic regression.
Social Security will run a cumulative cash deficit of $2.8 trillion between now and 2034.

**SOCIAL SECURITY SURPLUSES/DEFICITS (% OF GDP)**

- **Total Deficit $2.8 Trillion**
- **Actual**
- **Projected**
- **Trust Fund Depleted**

**NOTE:** Surplus/deficit numbers exclude interest income. The total deficit of $2.8 trillion is the present value of the cash deficits between 2016 and 2034.

As the population ages, fewer workers will be paying taxes to support each Social Security beneficiary.

**WORKERS PER BENEFICIARY**

- **1970**: 3.7
- **1990**: 3.4
- **2010**: 2.9
- **2030**: 2.3

Low-income seniors rely on Social Security benefits for a major share of their retirement income

**SOCIAL SECURITY BENEFITS (% OF TOTAL INCOME)**

- **Lowest Quintile** (Under $13,499): 81%
- **Second Quintile** ($13,499–$23,592): 81%
- **Middle Quintile** ($23,592–$39,298): 61%
- **Fourth Quintile** ($39,298–$72,129): 39%
- **Highest Quintile** (Over $72,129): 15%

**SOURCE:** Social Security Administration, *Income of the Population 55 or Older, 2014*, April 2016. Compiled by PGPF.

**NOTE:** A quintile is one-fifth of the population.

---

The government collects revenue from a variety of sources

**2015 Total Revenues** $3,250 Billion

- Individual Income Taxes 47%
- Payroll Taxes 33%
- Corporate Income Taxes 11%
- Other 6%
- Excise Taxes 3%
- Estate and Gift Taxes 1%

**NOTE:** Other includes customs duties and miscellaneous sources. Numbers do not sum to 100% due to rounding.
The U.S. tax system is generally progressive, with higher-income taxpayers facing higher tax rates.

The top 1 percent of taxpayers generate 38 percent of individual income tax revenue.

NOTE: Individual income tax rates for the lowest and second lowest quintiles are negative and are netted against the payroll tax rate. A quintile is one-fifth of the population. The income breaks (in 2017 dollars) are: 20% $24,600; 40% $47,700; 60% $84,300; 80% $147,700; 90% $214,700; 95% $306,100; 99% $717,900; 99.9% $2,917,600. Includes both filing and non-filing units but excludes those that are dependents of other tax units.

NOTE: The income break for the top one percent is $717,900 (in 2017 dollars).
NOTE: Medicare spending is net of premiums and payments from the states. Those receipts were $94 billion in 2015. Defense represents discretionary defense spending. Tax expenditures are deductions, credits, exclusions, and preferential rates. The estimates for tax expenditures include effects on income, payroll, and excise tax revenues, as well as effects on outlays.

The top 1 percent of taxpayers receive 17 percent of the total value of major tax expenditures

NOTE: In 2013, the top one percent includes a four-person household with income of at least $654,000 annually or a single-person household with income of at least $327,000 annually.
Six popular tax provisions account for nearly 60 percent of annual tax expenditures

<table>

NOTE: *Includes the exclusion from payroll taxes and income taxes. **Includes employer pension plans, employee and employer contributions to 401k plans, IRAs, and self-employed plans. Numbers may not sum to total because of rounding.

Although the incomes of the wealthy are volatile, they have grown much faster than the incomes of other groups

**Average Annual After-Tax Income (2013 Dollars)**

- **Top 1%**: Increase of $687,600 (+197%)
- **Top 20%**: Increase of $94,200 (+93%)
- **Middle 20%**: Increase of $17,200 (+39%)
- **Lowest 20%**: Increase of $8,200 (+50%)

The median real income for families in the United States has seen slow growth for decades.

**MEDIAN FAMILY INCOME (2015 DOLLARS)**

Source: U.S. Census Bureau, Historical Income Tables, September 2016. Compiled by PGPF.

The growing federal debt would reduce family incomes substantially.

**INCOME LOSS FOR A 4-PERSON FAMILY, ON AVERAGE (2017 DOLLARS)**

Source: Congressional Budget Office, The 2017 Long-Term Budget Outlook, March 2017. Calculated by PGPF.

Note: The income measures are based on CBO’s projections of real gross national product (GNP) per person. The income loss is the difference between the income level if debt rises as it does under current law and the income level if debt remains near its current share of GDP.
Waiting 5 years raises the cost of stabilizing the debt by 21 percent

SIZE OF BUDGET CHANGES NEEDED TO STABILIZE THE DEBT (% OF GDP)

SOURCE: Congressional Budget Office, The 2017 Long-Term Budget Outlook, March 2017. Compiled by PGPF.

Solutions do exist: PGPF Solutions Initiative plans from five think tanks show stable or declining federal debt through 2040

NOTE: Current policy is defined as the alternative fiscal scenario without economic feedback from CBO’s 2014 Long-Term Budget Outlook.
