

The national debt has now surpassed

\$31 TRILLION

\$24 trillion

in debt held by the public

\$7 trillion

in intragovernmental debt

\$31 TRILLION IS MORE THAN THE VALUE OF THE ECONOMIES OF

CHINA

+

JAPAN

+

GERMANY

+

UNITED KINGDOM

COMBINED

AND AMOUNTS TO

\$236,000

per household

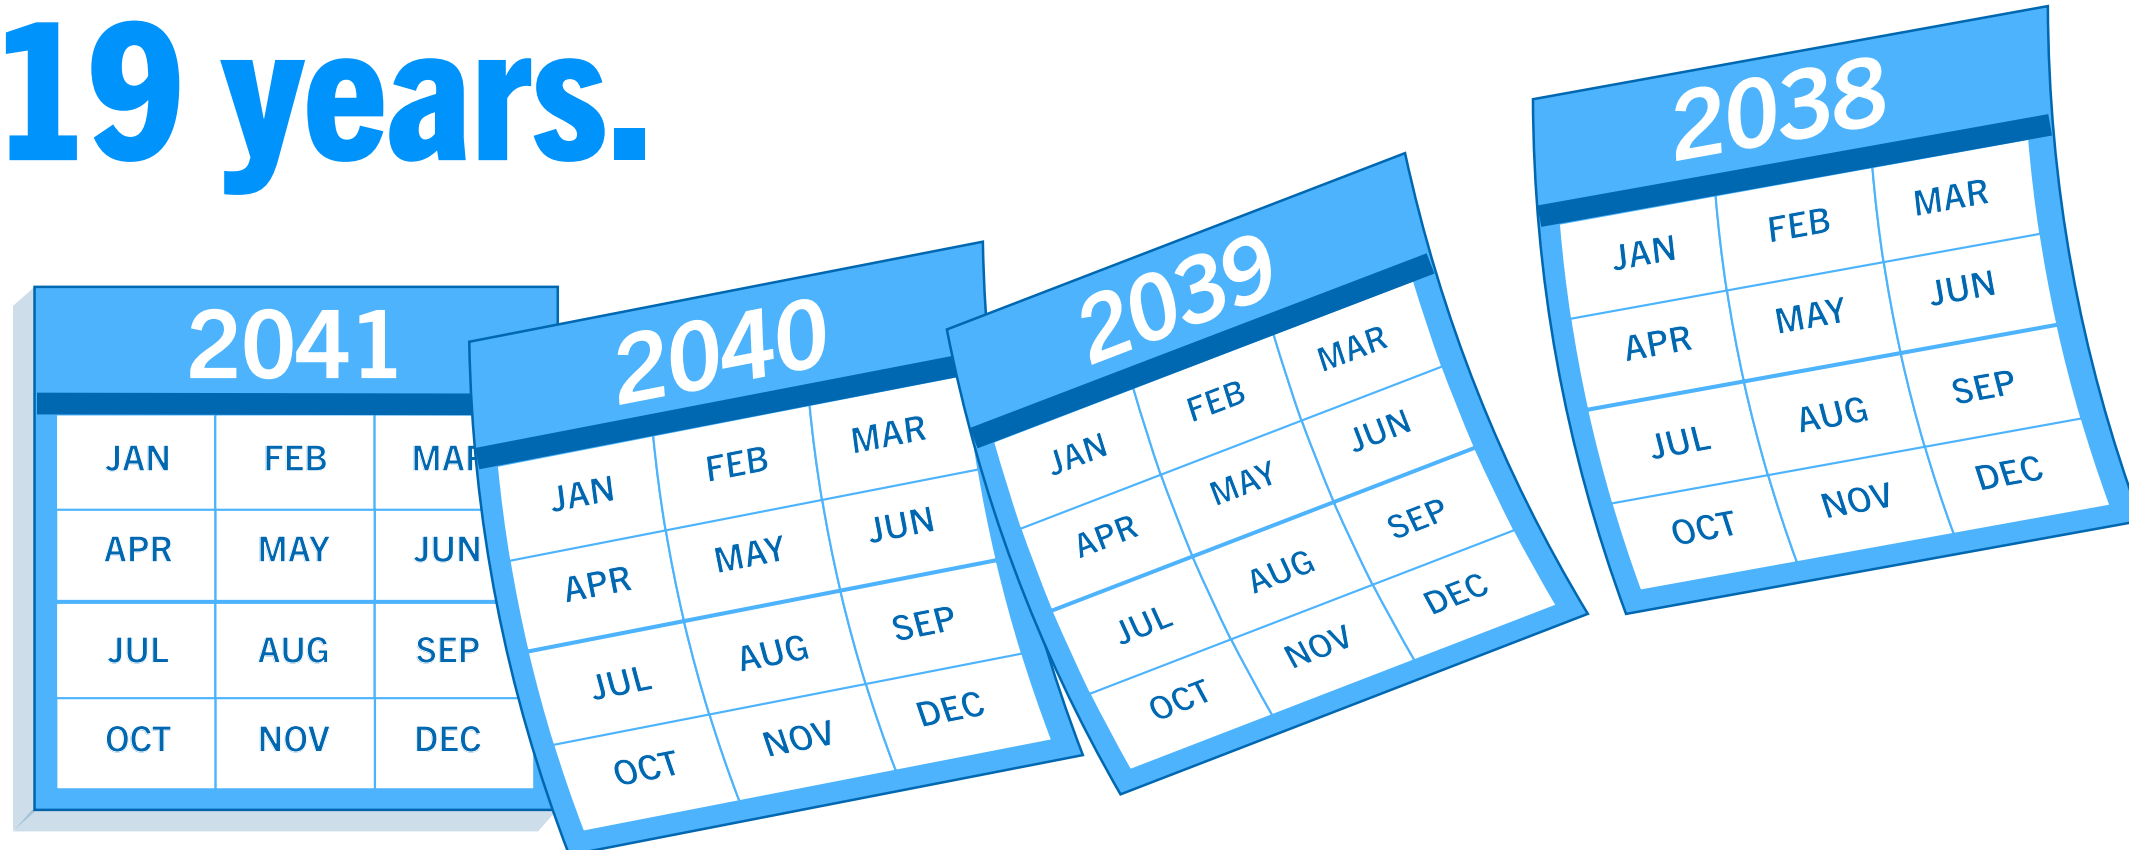

or

\$93,000

per person in America.

IF EVERY U.S. HOUSEHOLD CONTRIBUTED \$1,000/MONTH toward paying down the national debt it would take over

19 years.

Rising debt

can harm our economy and threaten opportunities for every American.

\$31 trillion is enough to cover a four-year degree for every graduating U.S. high school student for 73 years.

Within 10 years, the federal government will spend **more on interest payments** than it traditionally has on research and development, infrastructure, and education — **COMBINED.**

WE'RE NOT INVESTING ENOUGH IN OUR FUTURE.

But we are spending over

\$1 billion per day on interest payments on the debt.

As the pandemic wanes, it will be important to work together on sustainable solutions.
