The national debt has now surpassed

$35 TRILLION

$28 trillion in debt today
$7 trillion in Federal Reserve assets

$35 TRILLION IS ROUGHLY THE VALUE OF THE ECONOMIES OF

China
Germany
Japan
India
United Kingdom

COMBINED

AND AMOUNTS TO

$266,000 per household
or
$104,000 per person in America.

IF EVERY U.S. HOUSEHOLD CONTRIBUTED $1,000/MONTH toward paying down the national debt it would take about 22 years.

Rising debt can harm our economy and threaten opportunities for every American.

$35 trillion is enough to cover a public four-year degree for every graduating U.S. high school student for 103 years.

Within 10 years, the federal government will spend more on interest payments than it traditionally has on research and development, infrastructure, and education — COMBINED.

WE’RE NOT INVESTING ENOUGH IN OUR FUTURE.

But we are spending more than $2 billion per day on interest payments on the debt.

The good news is that there is still time to adjust course.

AND THE EARLIER WE GET STARTED, THE EASIER IT WILL BE TO FIX.
