Medicare and Medicaid account for the majority of federal healthcare expenditures

2025 Federal Health Expenditures
\$2,477 Billion

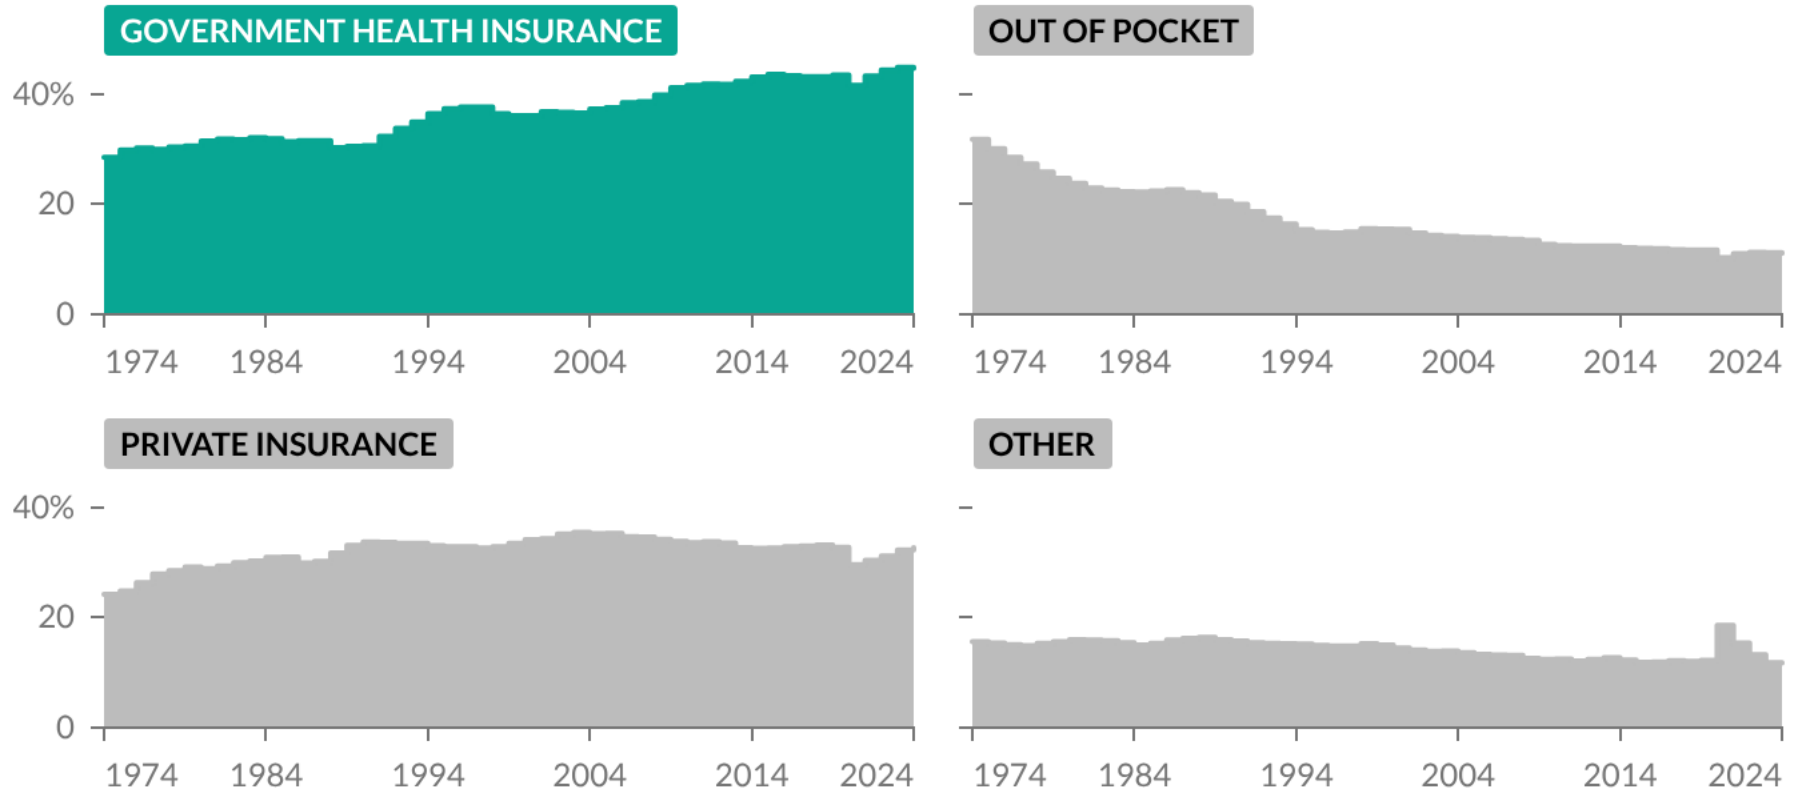

Sources: The Joint Committee on Taxation and Office of Management and Budget

Notes: Health-related income tax expenditures includes all tax expenditures (corporate and individual) classified under the Health function by the Joint Committee on Taxation. Medicare spending is net of offsetting receipts. "Other" includes net Federal Employees Health Benefits and other health.

The portion of health spending paid by government-sponsored insurance is growing

Source of Payment (% of Health Consumption Expenditures)

Source: Centers for Medicare and Medicaid Services

Notes: Government health insurance programs include Medicare, Medicaid, CHIP, and healthcare provided by the Department of Defense and the Department of Veterans' Affairs. Other includes federal and state health expenditures that are not insurance programs.
